Financial Crime Thematic Reviews

Chapter 10

The Small Firms Financial Crime Review (2010)

	10.1 Introduction
10.1.1	Who should read this chapter? This chapter is relevant, and its statements of good and poor practice apply, to small firms in all sectors who are subject to the financial crime rules in SYSC 3.2.6R or SYSC 6.1.1R and small e-money institutions and payment institutions within our supervisory scope.
10.1.2	In May 2010 the FSA published the findings of its thematic review into the extent to which small firms across the financial services industry addressed financial crime risks in their business. The review conducted visits to 159 small retail and wholesale firms in a variety of financial sectors. It was the first systematic review of financial crime systems and controls in small firms conducted by the FSA.
10.1.3	The review covered three main areas: anti-money laundering and financial sanctions; data security; and fraud controls. The review sought to determine whether firms understood clearly the requirements placed on them by the wide range of legislation and regulations to which they were subject.
10.1.4	The FSA found that firms generally demonstrated a reasonable awareness of their obligations, particularly regarding AML systems and controls. But it found weaknesses across the sector regarding the implementation of systems and controls put in place to reduce firms' broader financial crime risk.
10.1.5	The review emphasised the key role that the small firms sector often plays in acting as the first point of entry for customers to the wider UK financial services industry; and the importance, therefore, of firms having adequate customer due diligence measures in place. The report flagged up concerns relating to weaknesses in firms' enhanced due diligence procedures when dealing with high-risk customers.
10.1.6	The FSA concluded that, despite an increased awareness of the risks posed by financial crime and information supplied by the FSA, small firms were generally weak in their assessment and mitigation of financial crime risks.
10.1.7	The contents of this report are reflected in ■ FCG 2 (Financial crime systems and controls), ■ FCG 3 (Money laundering and terrorist financing), ■ FCG 4 (Fraud), ■ FCG 5 (Data security) and ■ FCG 7 (sanctions and asset freezes).

FCTR 10 : The Small Firms Financial Crime Review (2010)

		solidated examples of good poor practice
10.3.1	Regulatory/Legal obligations	
	Examples of good practice	Examples of poor practice
	 A small IFA used policies and procedures which been prepared by cons ants but the MLRO had tailored these to the fi business. There was als risk assessment of cus- tomers and products in cluded in an MLRO rep which was updated regularly. 	had not familiar with the sult- d an inadequate knowledge irm's of the firm's financial so a crime policies and procedures. n- port
	 One general insurance intermediary had an Al policy in place which w a very good standard a included many good ex amples of AML typolog relevant to GI business pite the fact that there no requirement for an MLRO for a business of type the firm had ap- pointed an individual t carry out an MLRO fun as a point of good prace 	ML was of and xx- gies s. 10.3.2	Account opening procedures	
10.3.2	Examples of good practice	Examples of poor practice
	 A discretionary portfol manager had procedur that required the verif tion of the identity of beneficial owners. The checked its customer b against sanctions lists a had considered the rist sociated with PEPs. More new customers were very by the adviser at home in these cases the advis would usually ask for it 	An IFA commented that they only dealt with invest- ment customers that were well known to the firm or regulated entities. How- ever, the firm had some high risk customers who ks as- ost due diligence (e.g.: copy of visited passport). The firm said e and that they were concerned about the high reputa-

	c v b n f c a	ity verification documents on the second meeting with the customer. Where ousiness was conducted re- notely, more (three or our) identity verification documents were required and the source of funds ex- emption was not used.	ent could have on their small, young business. The firm stated that they would deal with PEPs but with appropriate care. However, the firm did not have a rigorous system in place to be able to identify PEPs – this was a concern given the nationality and residence of some underly- ing customers. The firm ap- peared to have reasonable awareness of the sanctions requirements of both the Treasury and the United States Office of Foreign As- sets Control (OFAC), but there was no evidence in the customer files of any sanctions checking. A venture capital firm had policies in place which re- quired a higher level of due diligence and approval for high-risk customers. However, they had no sys- tem in place by which they could identify this type of customer.
10.3.3	Monitoring	a activity	
10.3.5	-	of good practice	
	•	A credit union used a computer-based had been specially designed for busin was able to produce a number of exc the union's members, including frequ faulted payments. The exceptions rep there had been no activity on an acco suspended. If the customer was to ret drawal they would be required to pro	ess of this type. The system eption reports relating to ency of transactions and de- orts were reviewed daily. If ount for 12 months it was curn and request a with-

	•	At an IFA the MLRO did not to report a SAR to SOCA, wh draft a SAR. The firm's polic forma SAR but this was not with. An IFA was unaware of the cions to SOCA and sanctions identified a person on the C normal and just report it as	nat to rep ies and pr a docume difference requirem consolidat	ort to SOCA, or how to rocedures contained a pro ent the MLRO was familiar e between reporting suspi- nents, believing that if he ed List he should carry on as
10.3.5	Records			
	Examples	of good practice	Examples	s of poor practice
	•	An advising-only intermedi- ary firm used a web- based system as its database of leads, contact names and addresses. It also stored telephone and meeting notes there which were ac- cessed by staff using indi- vidual passwords.	•	A file review at an IFA re- vealed disorganised files and missing KYC docu- mentation in three of five files reviewed. Files did not always include a checklist (We expect that KYC in- formation should be kept together in the file so that it is easily identifiable and auditable.)
	•	A home finance broker clas- sified customers as A, B or C for record keeping pur- poses. A's being Active, B's being 'one-off or infre- quent business' who he maintained contact with via a regular newsletter and C's being archived customers.		
10.3.6	Training			
	Examples	of good practice	Examples	s of poor practice
	•	A GI Intermediary used an on-line training website (costing around £100 per employee per year). The firm believed that the training was good quality and included separate modules on financial crime which were compulsory for staff to complete. Staff were also required to com- plete refresher training. An audit of all training completed was stored on- line.	•	A GI Intermediary ex- plained that the compli- ance manager carried out regular audits to confirm staff knowledge was suffi- cient. However, on inspec- tion of the training files it appeared that training was largely limited to product information and customer service and did not suffi- ciently cover financial crime.
	•	An IFA (sole trader) carried out on-line training on vari- ous financial crime topics. He also participated in con- ference call training where	•	One credit union, apart from on-the-job training for new staff members, had no regular training in place and no method to

	a trainer talked trainees through various topics	test staff knowledge of fin- ancial crime issues.
	while on-line; this was both time and travel efficient.	anciai crime issues.
0.3.7	Responsibilities and risk assessments	
	Examples of good practice	Examples of poor practice
	 At an IFA there was a cle- arly documented policy on data security which staff were tested on annually. The policy contained, but was not limited to, details around clear desks, non- sharing of passwords, the discouraging of the over- use of portable media de- vices, the secure disposal of data, and the logging of customer files removed and returned to the office. 	• At an IFA, a risk assessment had been undertaken by the firm's compliance con- sultant but the firm demon- strated no real appreci- ation of the financial crime risks in its business. The risk assessment was not tailored to the risks inher- ent in that business.
	• An IFA had produced a written data security review of its business which had been prompted by their external consultants and largely followed the small firms' factsheet material on data security, provided by the <i>FSA</i> in April 2008.	 An advising-only intermediary had its policies and procedures drawn up by an external consultant but these had not been tailored to the firm's business. The MLRO was unclear about investigating and reporting suspicious activity to SOCA. The firm's staff had not received formal training in AML or reporting suspicious activity to SOCA.
	• In a personal pension oper- ator, there was a full and comprehensive anti-fraud strategy in place and a full risk assessment had been carried out which was regularly reviewed. The firm's financial transac- tions were normally 'four eyed' as a minimum and there were strict mandates on cheque signatures for Finance Director and Fin- ance Manager.	
0.3.8	Access to systems	
	Examples of good practice	Examples of poor practice
	 In a Discretionary Invest- ment Management firm, the Chief Executive en- sured that he signed off on all data user profiles 	 In a financial advisory firm there was no minimum length for passwords, (al- though these had to be al- pha/numeric) and the prin-

	•	ensuring that systems ac- cesses were authorised by him. A discretionary investment manager conducted five year referencing on new staff, verified personal ad- dresses and obtained char- acter references from ac- quaintances not selected by the candidate. They also carried out annual credit checks, CRB checks and open source Internet searches on staff. There were role profiles for each job within the firm and these were reviewed monthly for accuracy. In a venture capital firm they imposed a minimum ten character (alpha/num- eric, upper/lower case) password for systems ac- cess which had a 45-day enforced change period.	•	cipal of the firm plus one other colleague knew all staff members' passwords. In an advising-only interme- diary, staff set their own systems passwords which had no defined length or complexity and were only changed every six months.
10.3.9	Outsourci	5		
10.3.9		ng of good practice	Examples	s of poor practice
10.3.9		5	•	s of poor practice An authorised professional firm employed the services of third-party cleaners, se- curity staff, and an offsite confidential waste com- pany, but had carried out no due diligence on any of these parties.
10.3.9		of good practice A discretionary investment manager used an external firm for IT support and had conducted its own on- site review of the IT firm's security arrangements. The same firm also insisted on CRB checks for	•	An authorised professional firm employed the services of third-party cleaners, se- curity staff, and an offsite confidential waste com- pany, but had carried out no due diligence on any of

	 diligence including CRB checks. Office door codes were regularly changed and always if there was a change in staff. In an authorised professional firm, unauthorised data access attempts by staff were monitored by the IT manager and email alerts sent to staff and management when identified. In a general insurance intermediary the two directors had recently visited the offsite data storage facility to satisfy themselves about the security arrangements at the premises. 	 longer than 20 minutes at any one time. There was also no clear-desk policy within the firm. In an authorised professional firm there had been two incidents where people had walked into the office and stolen staff wallets and laptops.
10.3.10	Physical controls	
	Examples of good practice	Examples of poor practice
	• At an IFA, staff email was monitored and monthly MI was produced, which included a monitoring of where emails had been directed to staff home addresses.	 In a general insurance in- termediary which had poor physical security in terms of shop front access, there were many insecure boxes of historical customer re- cords dotted around the of- fice in no apparent order. The firm had no control re- cord of what was stored in the boxes, saying only that they were no longer needed for the business.
	• At an investment advisory firm, staff were prohibited from using the Internet and Hotmail accounts. USB ports had been dis- abled on hardware and laptops were encrypted.	
10.3.11	Data disposal	
	Examples of good practice	Examples of poor practice
	• An advising and arran- ging intermediary used a third party company for all paper disposals, using secure locked bins pro- vided by the third party. All paper in the firm was treated as confidential and 'secure paper man- agement' was encour-	 In an IFA there was a clear- desk policy that was not enforced and customer data was stored in un- locked cabinets which were situated in a part of the office accessible to all visitors to the firm.

	 aged throughout the firm, enhanced by a monitored clear-desk policy. The firm was also aware that it needed to consider a process for secure disposal of electronic media as it was due to undergo a systems refit in the near future. An IFA treated all customer paperwork as confidential and had onsite shredding facilities. For bulk shredding the firm used a third party who provided bags and tags for labelling sensitive waste for removal, and this was collected and signed for by the third party's premises and satisfied themselves of their processes. The directors periodically checked office bins for confidential waste being mishandled. PCs which had come to 'end of life' were wiped using reputable software and physically destroyed. 	
10.3.12	Data compromise incidents Examples of good practice • A general insurance broker had suffered a suc- cession of break-ins to their offices. No data had been lost or stolen but the firm sought the ad- vice of local police over the incidents and em- ployed additional physical security as a result.	 In a general insurance intermediary, the IT manager said he would take responsibility for any data security incidents although there was no procedures in place for how to handle such occurrences. When asked about data security, the compliance officer was unable to articulate the financial crime risks that lax data security processes posed to the firm and said it would be something he would discuss with his IT manager.
10.3.13	General fraud Examples of good practice	Examples of poor practice

	fences against financial		
	crime.		
.14 Insurance	fraud		
	s of good practice	Examples of poor practice	
•	A small general insurer had compiled a hand- book which detailed indic- ators of potential insur- ance fraud.	 An IFA had a proplace to aid in the fication of high resources. However, identified, this fire enhanced due di procedures in plate with such custom 	ie identi isk cus- ; once rm had r ligence ace to de
•	An IFA had undertaken a risk assessment to under- stand where his business was vulnerable to insur- ance fraud.		
•	An IFA had identified where their business may be used to facilitate insur- ance fraud and imple- mented more controls in these areas.		
5 Investmer			
Example	s of good practice	Examples of poor practice	
•	An IFA had undertaken a risk assessment for all high net worth customers.	 An IFA had a 'on all' approach to i the risks associate customers and in 	identifyi ed with
•	A discretionary invest- ment manager referred higher risk decisions (in re- spect of a high risk cus- tomer/value of funds in- volved) to a specific senior manager.		
•	A personal pension oper- ator carried out a finan- cial crime risk assessment for newly introduced in- vestment products.		
6 Mortgage	fraud		
55	s of good practice	Examples of poor practice	
•	The majority of firms con- ducted customer fact finds. This allowed them to know their customers sufficiently to identify		con- e the re

	 gence. See FCG Annex 1 for common terms), in- cluding source of funds information, was also ob- tained early in the ap- plication process before the application was com- pleted and submitted to the lender. A home finance broker would not conduct any remote business – meet- ing all customers face-to- face. An IFA had informally as- sessed the mortgage fraud risks the business faced and was aware of potentially suspicious in- dicators. The IFA also looked at the fraud risks associated with how the company approached the firm – e.g. the firm felt that a cold call from a customer may pose a greater risk than those which had been referred by longstanding rustamere 	 An IFA did not investigate source of funds. The firm stated this was because 'a bank would pick it up and report it.' An IFA did not undertake extra verification of its non face-to-face customers.
10.3.17	customers. Staff/Internal fraud	
	 Examples of good practice An IFA obtained full reference checks (proof of identity, eligibility to work and credit checks) prior to appointment. Original certificates or other original documentation was also requested. 	 One general insurance in- termediary did not under- take any background checks before appointing a member of staff or authen- ticate qualifications or references.
	• An IFA ensured that staff vetting is repeated by completing a credit reference check on each member of staff.	• Company credit card usage was not monitored or re- conciled at an IFA. An IFA had the same computer log-on used by all staff in the office no matter what their role.
	• An IFA set a low credit limit for each of its com- pany credit cards. Bills are	
	sent to the firm and each month the holder has to produce receipts to recon- cile their claim.	

met for all payments made over £5,000.
