Financial Crime Thematic Reviews

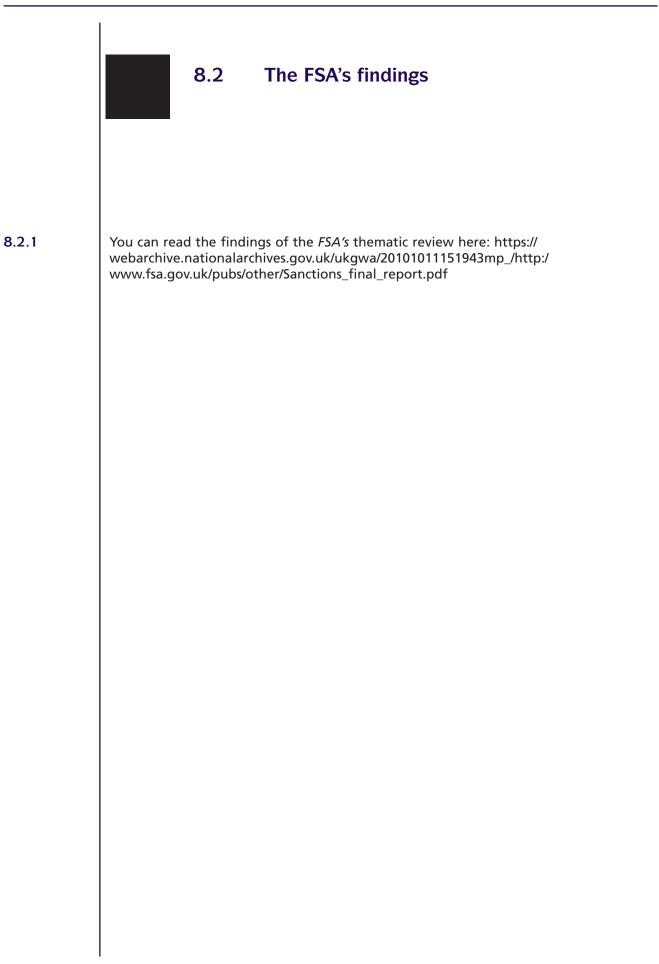

Chapter 8

Financial services firms' approach to UK financial sanctions (2009)

FCTR 8 : Financial services firms' approach to UK financial sanctions (2009)

	8.1 Introduction
8.1.1	Who should read this chapter? This chapter is relevant, and its statements of good and poor practice apply, to all firms subject to the financial crime rules in SYSC 3.2.6R or SYSC 6.1.1R and to e-money institutions and payment institutions within our supervisory scope.
8.1.2	In April 2009 the FSA published the findings of our thematic review of firms' approach to UK financial sanctions. The FSA received 228 responses to an initial survey from a broad range of firms across the financial services industry, ranging from small firms to major financial groups, both retail and wholesale. Tailored surveys were sent to different types of firms to ensure that the questions were relevant to the nature and scale of the business of each firm. The FSA then selected a sub-sample of 25 firms to visit to substantiate the findings from the surveys.
8.1.3	The review highlighted areas where there was significant scope across the industry for improvement in firms' systems and controls to comply with the UK financial sanctions regime. The <i>FSA</i> found that, while some firms had robust systems in place that were appropriate to their business need, others, including some major firms, lacked integral infrastructure and struggled with inappropriate systems for their business. In small firms in particular, the <i>FSA</i> found a widespread lack of awareness of the UK financial sanctions regime.
8.1.4	The report examined a number of key areas of concern which included an in- depth look at whether senior management were aware of their responsibilities and, if so, were responding in an appropriate manner. The <i>FSA</i> also identified issues over the implementation of policies and procedures, particularly those put in place to ensure that staff were adequately trained, were kept aware of changes in this area, and knew how to respond when sanctions were imposed. The <i>FSA</i> also had concerns about firms' screening of clients, both initially and as an ongoing process.
8.1.5	The contents of this report are reflected in FCG 2 (Financial crime systems and controls) and FCG 7 (Sanctions and asset freezes).

	8.3 Consolida poor prac	ited examples of good and ctice
8.3.1	Senior management responsibility	
	Examples of good practice	Examples of poor practice
	 Senior management involve- ment in approving and tak- ing responsibility for policies and procedures. 	• No senior management in- volvement or understanding regarding the firm's obliga- tions under the UK financial sanctions regime, or its sys- tems and controls to comply with it.
	• A level of senior manage- ment awareness of the firm's obligations regarding financial sanctions sufficient to enable them to discharge their functions effectively.	 No, or insufficient, management oversight of the day- to-day operation of systems and controls.
	• Appropriate escalation in cases where a potential tar- get match cannot easily be verified.	• Failure to included assess- ments of the financial sanc- tions systems and controls as a normal part of internal audit programmes.
	• Adequate and appropriate resources allocated by senior management.	 No senior management in- volvement in any cases where a potential target match cannot easily be verified.
	• Appropriate escalation of ac- tual target matches and breaches of UK financial sanctions.	• Senior management never being made aware of a tar- get match or breach of sanc- tions for an existing customer.
		• Failure to notify customers affected by data loss in case the details are picked up by the media.
8.3.2	Risk assessment	
	Examples of good practice	Examples of poor practice
	• Conducting a comprehens- ive risk assessment, based on	• Not assessing the risks that the firm may face of

Examples of good practice	Examples of poor practice
• Regularly updated training and awareness programmes that are relevant and appro- priate for employees' par- ticular roles.	 No training on financial sanctions.
• Testing to ensure that em- ployees have a good under- standing of financial sanc- tions risks and procedures.	 Relevant staff unaware of the firm's policies and pro- cedures to comply with the UK financial sanctions regime.
• Ongoing monitoring of em- ployees' work to ensure they understand the finan- cial sanctions procedures and are adhering to them.	• Changes to the financial sanctions policies, proced- ures, systems and controls are not communicated to relevant staff.
• Training provided to each business unit covering both the group-wide and business unit-specific policies on financial sanctions.	
	Examples of poor practice
 An effective screening sys- tem appropriate to the na- ture, size and risk of the firm's business. 	 Screening only on notifica- tion of a claim on an insur- ance policy, rather than dur- ing client take-on.
• Screening against the Con- solidated List at the time of client take-on before provid- ing any services or undertak- ing any transactions for a customer.	• Relying on other FSA-au- thorised firms and compli- ance consultants to screen clients against the Consolid- ated List without taking reasonable steps to ensure that they are doing so ef- fectively.
• Screening directors and be- neficial owners of corporate customers.	 Assuming that AML cus- tomer due diligence checks include screening against the Consolidated List.
 Screening third party payees where adequate in- formation is available. 	• Failing to screen UK-based clients on the assumption that there are no UK-based persons or entities on the Consolidated List or failure to screen due to any other misconception.
• Where the firm's procedures require dual control (e.g. a 'four eyes' check) to be used, having in place an effective process to ensure this happens.	• Large global institutions with millions of clients us- ing manual screening, in- creasing the likelihood of human error and leading to matches being missed.
	 Regularly updated training and awareness programmes that are relevant and appro- priate for employees' par- ticular roles. Testing to ensure that em- ployees have a good under- standing of financial sanc- tions risks and procedures. Ongoing monitoring of em- ployees' work to ensure they understand the finan- cial sanctions procedures and are adhering to them. Training provided to each business unit covering both the group-wide and busi- ness unit-specific policies on financial sanctions. Screening during client take-on Examples of good practice An effective screening sys- tem appropriate to the na- ture, size and risk of the firm's business. Screening against the Con- solidated List at the time of client take-on before provid- ing any services or undertak- ing any transactions for a customer. 	gested by external software providers.		
•	Systems calibrated to in- clude 'fuzzy matching', in- cluding name reversal, digit rotation and character ma- nipulation.		
•	Flags on systems promin- ently and clearly identified.		
•	Controls that require refer- ral to relevant compliance staff prior to dealing with flagged individuals or entities.		
Treatmen	t of potential target matches		
Example	s of good practice	Example	es of poor practice
•	Procedures for investiga- ting whether a potential match is an actual target match or a false positive.	•	No procedures in place fo investigating potential matches with the Consolid ated List.
•	Procedures for freezing ac- counts where an actual tar- get match is identified.	•	Discounting actual target matches incorrectly as fals positives due to insufficie investigation.
•	Procedures for notifying the Treasury's AFU promptly of any confirmed matches.	•	No audit trail of decisions where potential target matches are judged to be false positives.
•	Procedures for notifying senior management of tar- get matches and cases where the firm cannot de- termine whether a poten- tial match is the actual tar- get on the Consolidated List.		
•	A clear audit trail of the in- vestigation of potential tar- get matches and the de- cisions and actions taken, such as the rationale for de- ciding that a potential tar- get match is a false
