Distributions constituting disproportionate drags on capital or preferential distributions

7.7

R

(1)

This *rule* applies for the purpose of determining whether a distribution on an instrument intended to qualify as a *common equity tier 1 capital instrument* constitutes a disproportionate drag

on capital under article 28(1)(h)(iii) and 28(3) of the UK CRR.

- (2)References in this rule to the "dividend multiple" are to the dividend multiple referred to in article 28(3) of the UK CRR.
- (3)Distributions on an instrument will not constitute a disproportionate drag on capital for the purposes of (1) where:
  - (a) the dividend multiple is a multiple of the distribution paid on the voting instruments and is not a predetermined fixed amount;
  - (b) the dividend multiple is set contractually or under the statutes of the firm;
  - (c) the dividend multiple is not revisable;
  - the same dividend multiple ap-(d) plies to all instruments with a dividend multiple;
  - (e) the amount of distribution on one instrument with a dividend multiple does not represent more than 125% of the amount of the distribution on one voting common equity tier 1 instrument, as determined in accordance with the formula in (6);
  - (f) the total amount of the distributions paid on all common equity tier 1 instruments during a oneyear period does not exceed 105% of the amount that would have been paid if instruments with fewer or no voting rights received the same distributions as voting instruments, as determined in accordance with the formula in (7).
- (4)Where the conditions in (3)(a) to (3)(e) are not met, all outstanding instruments with a dividend multiple shall be deemed to cause a disproportionate drag on capital for the purposes of (1).
- (5)Where the condition in (3)(f) is not met, only the amount of the instruments with a dividend multiple that exceeds the threshold in that provision shall be deemed to cause a disproportionate drag on capital for the purposes of (1).
- (6)The formula referred to in (3)(e) is:

*I* ≤ 1.25 x *k* 

where:

k = the amount of the distribution on one instrument without a dividend multiple; and

I = the amount of the distribution on one instrument with a dividend multiple.

		(7)		referred to in (3)(f) applies on a sis and is as follows:
			$kX + IY \leq (1.$	05) x k x (X + Y)

PRU 3 Annex 7.32R(2)(d) and (e).

- (2)A firm must calculate the amount of indirect holdings of common equity tier 1 instruments to be deducted as follows:
  - where the exposures of all in-(a) vestors to the intermediate entity rank pari passu, the amount shall be equal to the percentage of funding multiplied by the amount of common equity tier 1 instruments of the financial sector entity held by the intermediate entity;
  - where the exposures of all in-(b) vestors to the intermediate entity do not rank pari passu, the amount shall be equal to the percentage of funding multiplied by the lower of the following amounts:
    - the amount of (i) common equity tier 1 instruments of the financial sector entity held by the intermediate entity;
    - (ii) the firm's exposure to the intermediate entity together with all other funding provided to the intermediate entity that rank pari passu with the firm's exposure.
- A firm must use the calculation method in (2)(b) (3)for each tranche of funding that ranks pari passu with the funding provided by the firm.
- (4)The percentage of funding in (2) is calculated as the firm's exposure to the intermediate entity divided by the sum of the firm's exposure to the intermediate entity and all other exposures to the

			intermediate entity that rank pari passu with the firm's exposure.
		(5)	A <i>firm</i> must carry out the calculation in (2) separately for each holding in a <i>financial sector entity</i> held by each <i>intermediate entity</i> .
		(6)	Where a firm holds investments in common equity tier 1 instruments of a financial sector entity indirectly through several intermediate entities, the firm must determine the percentage of funding in (2) by dividing the amount in (a) below by the amount in (b):
			(a) the result of the multiplication of amounts of funding provided by the firm to intermediate entities by the amounts of funding provided by these intermediate entities to subsequent intermediate entities and by amounts of funding provided by these subsequent intermediate entities to the financial sector entity;
			(b) the result of the multiplication of amounts of capital instruments or other instruments as relevant, issued by each intermediate entity.
		(7)	The percentage of funding referred to in (6) must be calculated separately for each holding in a financial sector entity held by intermediate entities and for each tranche of funding that ranks pari passu with the funding provided by the firm and the subsequent intermediate entities.
