Possible breaches of regulatory requirements

4.7.13

Where the approved person performing an accountable higher management function becomes aware of actual or suspected problems that involve possible breaches of relevant requirements and standards of the regulatory system falling within their area of responsibility, then they should take reasonable steps to ensure that they are dealt with in a timely and appropriate manner (APER 4.7.7G). This may involve an adequate investigation to find out what systems or procedures may have failed and why. He may need to obtain expert opinion on the adequacy and efficacy of the systems and procedures.

Review and improvement of systems and procedures

G 4.7.14

Where independent reviews of systems and procedures have been undertaken and result in recommendations for improvement, the approved person performing an accountable higher management function should ensure that, unless there are good reasons not to, any reasonable recommendations are implemented in a timely manner (APER 4.7.8G). What is reasonable will depend on the nature of the inadequacy and the cost of the improvement. It will be reasonable for the approved person performing an accountable higher management function to carry out a cost benefit analysis when assessing whether the recommendations are reasonable.
