

## Chapter 1

# Implementation For Trading Venues & Data Reporting Service Providers

**1.7 Overview**

- 1.7.1** **G** The diagram in M2G 1 Annex 1 provides an overview of trading venue and DRSP requirements deriving from MiFID 2 and the location of their implementation. The references to technical standards are to those described in the FCA Handbook Glossary. The technical standards can be accessed from the Commission website.
- 1.7.2** **G** In addition to MAR and other requirements noted in the overview, firms operating an MTF or OTF will be subject to other MiFID requirements applying elsewhere in the Handbook, notably in SYSC, COBS and SUP 17A.
- 1.7.3** **G** SUP 17A sets out rules and guidance for transaction reporting and supply of reference data: it also cross-refers to the relevant EU legislation in articles 26 and 27 MiFIR and MiFID RTS 22 and 23 (see Glossary (MiFID 2) Instrument 2017 (FCA 2017/36) at [https://www.handbook.fca.org.uk/instrument/2017/FCA\\_2017\\_36.pdf](https://www.handbook.fca.org.uk/instrument/2017/FCA_2017_36.pdf)). It further confirms that we will allow operators of trading venues and investment firms to use third party technology providers when supplying financial instrument reference data to the FCA.
