(Article 57(1) of Directive 2014/65/EU)

2. The person referred to in paragraph 1 shall submit to the competent authority the following information which demonstrates how the position reduces risks directly relating to the non-financial entity's commercial activity:

   (a) a description of the nature and value of the non-financial entity's commercial activities in the commodity to which the commodity derivative for which an exemption is sought is relevant;

   (b) a description of the nature and value of the non-financial entity's activities in the trading of and positions held in the relevant commodity derivatives traded on trading venues and in their economically equivalent OTC contracts;

   (c) a description of the nature and size of the exposures and risks in the commodity which the non-financial entity has or expects to have as a result of its commercial activities and which are or would be mitigated by the use of commodity derivatives;

   (d) an explanation of how the non-financial entity's use of commodity derivatives directly reduces its exposure and risks in its commercial activities.

3. The competent authority shall approve or reject the application within 21 calendar days after it has received the application and shall notify the non-financial entity of its approval or rejection of the exemption.

4. The non-financial entity shall notify the competent authority if there is a significant change to the nature or value of the non-financial entity's commercial activities or its trading activities in commodity derivatives and the change is relevant to the information set out in point (b) of paragraph 2 and shall submit a new application for the exemption if it intends to continue to use it.
CHAPTER III

METHODOLOGY FOR THE COMPETENT AUTHORITIES AUTHORITY TO CALCULATE POSITION LIMITS

SECTION 1

Determination of baseline figures

Article 9

Methodology for determining the baseline figure for spot month limits

(Article 57(4) of Directive 2014/65/EU)

1. Competent authorities The competent authority shall determine a baseline figure for the spot month position limit in a commodity derivative by calculating 25% of the deliverable supply for that commodity derivative.

2. The baseline figure shall be specified in lots which shall be the unit of trading used by the trading venue on which the commodity derivative trades representing a standardised quantity of the underlying commodity.

3. Where the competent authority establishes different position limits for different times within the spot month period, those position limits shall decrease on an incremental basis towards the maturity of the commodity derivative and shall take into account the position management arrangements of the trading venue.

4. By way of derogation to paragraph 1, the competent authorities authority shall determine the baseline figure for the spot month position limit for any derivative contract with an underlying that qualifies as food intended for human consumption with a total combined open interest in spot and other months' contracts exceeding 50,000 lots over a consecutive three month period by calculating 20% of the deliverable supply in that commodity derivative.

Article 10

Deliverable supply

(Article 57(3) of Directive 2014/65/EU)

1. Competent authorities The competent authority shall calculate the deliverable supply for a commodity derivative by identifying the quantity of the underlying commodity that can be used to fulfil the delivery requirements of the commodity derivative.

2. Competent authorities The competent authority shall determine the deliverable supply for a commodity derivative referred to in paragraph 1 by reference to the average monthly amount of the underlying commodity available for delivery over the one year period immediately preceding the determination.

3. In order to identify the quantity of the underlying commodity meeting the conditions of paragraph 1, the competent authorities authority shall take into account the following criteria:
(a) the storage arrangements for the underlying commodity;
(b) the factors that may affect the supply of the underlying commodity.

Article 11

Methodology for determining the baseline figure for other months' limits

(Article 57(4) of Directive 2014/65/EU)

1. Competent authorities The competent authority shall determine a baseline figure for the other months' position limit in a commodity derivative by calculating 25% of the open interest in that commodity derivative.

2. The baseline figure shall be specified in lots which shall be the unit of trading used by the trading venue on which the commodity derivative trades representing a standardised quantity of the underlying commodity.

Article 12

Open interest

(Article 57(3) of Directive 2014/65/EU)

Competent authorities The competent authority shall calculate the open interest in a commodity derivative by aggregating the number of lots of that commodity derivative that are outstanding on trading venues at a point in time.

Article 13

Methodology for determining the baseline figure in respect of certain contracts

(Article 57(4) of Directive 2014/65/EU)

1. By way of derogation to Article 9, the competent authorities shall determine the baseline figure for the spot month position limits for cash settled spot month contracts which are under C(10) of Annex I to Directive 2014/65/EU, paragraph 10 of Part 1 of Schedule 2 to the Regulated Activities Order and which have no measurable deliverable supply of their underlying commodities by calculating 25% of the open interest in those commodity derivative contracts.

2. By way of derogation to Articles 9 and 11, the competent authorities shall determine the baseline figure for the position limits for commodity derivatives defined under Article 4(1)(14) of Directive 2014/65/EU, Article 2(1)(24) of Regulation 600/2014/EU by calculating 25% of the number of securities issued. The baseline figure shall be specified in number of securities.

3. By way of derogation to Articles 9 and 11, where a commodity derivative provides that the underlying is delivered constantly over a specified period of time, the baseline figures calculated pursuant to Articles 9 and 11 shall apply to related commodity
derivatives for the same underlying to the extent that their delivery periods overlap. The baseline figure shall be specified in units of the underlying.

SECTION II
Factors relevant for the calculation of position limits

Article 14
Assessment of factors
(Article 57(3) of Directive 2014/65/EU)

Competent authorities. The competent authority shall set the spot month and other months' position limits for a commodity derivative by taking the baseline figure determined in accordance with Articles 9, 11 and 13 and adjusting it according to the potential impact of the factors referred to in Articles 16 to 20 on the integrity of the market for that derivative and for its underlying commodity to a limit:

(a) between 5% and 35%; or
(b) between 25% and 35%, for any derivative contract with an underlying that qualifies as food intended for human consumption with a total combined open interest in spot and other months’ contracts exceeding 50,000 lots over a consecutive three month period.

Article 15
New and illiquid contracts
(Article 57(3)(g) of Directive 2014/65/EU)

1. By way of derogation to Article 14,
(a) for commodity derivatives traded on a trading venue with a total combined open interest in spot and other months' contracts not exceeding 10,000 lots over a consecutive three month period, the competent authorities authority shall set the limit of positions held in those commodity derivatives at 2,500 lots;
(b) for commodity derivatives traded on a trading venue with a total combined open interest in spot and other months' contracts in excess of 10,000 but not exceeding 20,000 lots over a consecutive three month period, the competent authorities authority shall set the spot and other months' position limit between 5% and 40%;
(c) for commodity derivatives as defined in Article 4(1)(44) of Directive 2014/65/EU Article 2(1)(24) of Regulation 600/2014/EU with a total number of securities in issue not exceeding 10 million over a consecutive three month period, the competent authority shall set the limit of positions held in those commodity derivatives at 2.5 million securities;
(d) for commodity derivatives as defined in Article 4(1)(44) of Directive 2014/65/EU Article 2(1)(24) of Regulation 600/2014/EU with a total number of securities in issue in excess of 10 million but not exceeding 20 million over
a consecutive three month period, the competent authority shall set the spot and other months' position limit between 5% and 40%.

2. The trading venue shall notify the competent authority when the total open interest of any such commodity derivative reaches any of the amounts of lots or number of securities in issue mentioned in the previous paragraph over a consecutive three month period. The competent authority shall review the position limit upon receiving such notifications.

Article 16

The maturity of the commodity derivatives contracts

(Article 57(3)(a) of Directive 2014/65/EU)

1. For spot month position limits, if the commodity derivative has a short maturity, the competent authority shall adjust the position limit downwards.

2. For other months' position limits, where the commodity derivative has a large number of separate expiries, the competent authority shall adjust the position limit upwards.

Article 17

Deliverable supply in the underlying commodity

(Article 57(3)(b) of Directive 2014/65/EU)

Where the deliverable supply in the underlying commodity can be restricted or controlled or if the level of deliverable supply is low relative to the amount required for orderly settlement the competent authority shall adjust the position limit downwards. The competent authority shall assess the extent to which this deliverable supply is used also as the deliverable supply for other commodity derivatives.

Article 18

The overall open interest

(Article 57(3)(c) of Directive 2014/65/EU)

1. Where there is a large volume of overall open interest, the competent authority shall adjust the position limit downwards.

2. Where the open interest is significantly higher than the deliverable supply, the competent authority shall adjust the position limit downwards.

3. Where the open interest is significantly lower than the deliverable supply, the competent authority shall adjust the position limit upwards.
Article 19

The number of market participants
(Article 57(3)(e) of Directive 2014/65/EU)

1. Where the daily average number of market participants holding a position in the commodity derivative over a period of one year is high the competent authority shall adjust the position limit downwards.

2. By way of derogation to Article 14, the competent authorities shall set the spot month and other months' position limit between 5% and 50% if:
   (a) the average number of market participants holding a position in the commodity derivative in the period leading up to the setting of the position limit is lower than 10; or
   (b) the number of investment firms acting as a market maker in accordance with Article 4(1)(7) of Directive 2014/65/EU Article 2(1)(6) of Regulation 600/2014/EU in the commodity derivative at the time the position limit is set or reviewed is lower than 3.

For the purposes of the first subparagraph, the competent authorities may establish different position limits for different times within the spot month period, the other months' period or for both periods.

Article 20

Characteristics of the underlying commodity market
(Article 57(3)(f) of Directive 2014/65/EU)

1. Competent authorities The competent authority shall take into account how the characteristics of the underlying market impact on the functioning and trading of the commodity derivative and on the size of the positions held by market participants, including having regard to the ease and speed of access which market participants have to the underlying commodity.

2. The assessment of the underlying commodity market referred to in paragraph 1 shall take into account:
   (a) whether there are restrictions on the supply of the commodity, including the perishability of the deliverable commodity;
   (b) the method of transportation and delivery of the physical commodity, including the following:
      (i) whether the commodity can be delivered to specified delivery points only;
      (ii) the capacity constraints of specified delivery points.
   (c) the structure, organisation and the operation of the market, including the seasonality present in extractive and agricultural commodity markets whereby physical supply fluctuates over the calendar year;
(d) the composition and role of market participants in the underlying commodity market, including consideration of the number of market participants which provide specific services that enable the functioning of the underlying commodity market such as risk management, delivery, storage, or settlement services;

(e) macroeconomic or other related factors that influence the operation of the underlying commodity market including the delivery, storage, and settlement of the commodity;

(f) the characteristics, physical properties and lifecycles of the underlying commodity.

### Article 21

**Volatility of the relevant markets**

(Article 57(3)(d)) of Directive 2014/65/EU)

After having applied the factors referred to in Articles 16 to 20 which are relevant to set the position limit for each contract in commodity derivatives referred to in Article 57(4) of Directive 2014/65/EU regulation 16 of the Financial Services and Markets Act 2000 (Markets in Financial Instruments) Regulations 2017, the competent authorities shall further adjust that position limit where the following conditions are met:

(a) there is excessive volatility in the price of commodity derivative or in the underlying commodity;

(b) a further adjustment of the position limit would effectively reduce the excessive volatility in the price of that commodity derivative or in the underlying commodity.

   (h) 20% in relation to emission allowances or derivatives thereof.

2. 4. The aggregate values referred to in paragraphs 2 and 3 shall be denominated in EUR.
Article 3

Main business threshold

1. The activities referred to in Article 1 shall be considered to constitute a minority of activities at group level where they comply with any of the following conditions:

   (b) the estimated capital employed for carrying out those activities calculated in accordance with paragraphs 5 to 7 does not account for more than 10% of the capital employed at group level for carrying out the main business calculated in accordance with paragraph 9.

2. The following derogations from paragraph 1(a) shall apply:
   (a) where the size of the activities referred to in Article 1 calculated in accordance with the first subparagraph of paragraph 3 accounts for more than 10% but less than 50% of the total size of the trading activity of the group calculated in accordance with the second subparagraph of paragraph 3, ancillary activities shall be considered to constitute a minority of activities at group level only where the size of the trading activity for each of the asset classes referred to in Article 2(1) accounts for less than 50% of the threshold established by Article 2(1) for each relevant asset class;
   (b) where the size of the trading activities calculated in accordance with the first subparagraph of paragraph 3 accounts for equal to or more than 50% of the total size of the trading activity of the group calculated in accordance with the second subparagraph of paragraph 3, ancillary activities shall be considered to constitute a minority of activities at group level only where the size of the trading activity for each of the asset classes referred to in Article 2(1) accounts for less than 20% of the threshold established by Article 2(1) for each relevant asset class.

3. The size of the activities referred to in Article 1 undertaken by a person within a group shall be calculated by aggregating the size of the activities undertaken by that person with respect to all of the asset classes referred to in Article 2(1) in accordance with the same calculation criteria as that referred to in Article 2(2).

   The total size of the trading activity of the group shall be calculated by aggregating the gross notional value of all contracts in commodity derivatives, emission allowances and derivatives thereof to which persons within that group are a party to.

4. The aggregation referred to in the first subparagraph of paragraph 3 shall not include contracts where the person within the group that is a party to any of those contracts is authorised in accordance with Directive 2014/65/EU or Directive 2013/36/EU or as such in accordance with Part 4A of the Financial Services and Markets Act 2000 to provide investment services or perform investment activities or accept deposits (as a CRD credit institution).

   (a) 15% of each net position, long or short, multiplied by the price for the commodity derivative, emission allowance or derivatives thereof;
   (b) 3% of the gross position, long plus short, multiplied by the price for the commodity derivative, emission allowance or derivatives thereof.

6. For the purposes of paragraph 5, point (a), the net position in a commodity derivative, an emission allowance or derivative thereof shall be determined by netting long and short positions:
   (a) in each type of commodity derivative contract with a particular commodity as underlying in order to calculate the net position per type of contract with that commodity as underlying;
   (b) in an emission allowance contract in order to calculate the net position in that emission allowances contract; or
   (c) in each type of emission allowance derivative contract in order to calculate the net position per type of emission allowance derivative contract.

For the purposes of paragraph 5, point (a), net positions in different types of contracts with the same commodity as underlying or different types of derivative contracts with the same emission allowance as underlying can be netted against each other.

7. For the purposes of paragraph 5, point (b), the gross position in a commodity derivative, an emission allowance or a derivative contract thereof, shall be determined by computing the sum of the absolute values of the net positions per type of contract with a particular commodity as the underlying, per emission allowance contract or per type of contract with a particular emission allowance as the underlying.

For the purposes of paragraph 5, point (b), net positions in different types of derivative contracts with the same commodity as underlying or different types of derivative contracts with the same emission allowance as underlying cannot be netted against each other.

8. The calculation of the estimated capital shall not include positions resulting from transactions referred to in points (a), (b) and (c) of subparagraph 5 of Article 2(4) of Directive 2014/65/EU.

9. The capital employed for carrying out the main business of a group shall be the sum of the total assets of the group minus its short-term debt as recorded in its consolidated financial statements of the group at the end of the relevant annual calculation period. For the purposes of the first sentence, short-term debt means debt with a maturity of less than 12 months.

10. The values resulting from the calculations referred to in this Article shall be denominated in EUR.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
